

UGWUJA ECHEZONACHI COLLINS

COMPUTER ENGINEERING

PROFILE

Engineer with experience in automation, PLCs, HMIs, and IoT systems for industrial operations. Skilled in integrating control systems, instrumentation, and process monitoring to enhance efficiency, safety, and reliability. Proven track record in automation and process optimization projects, with a focus on delivering sustainable and impactful results.

PROFESSIONAL EXPERIENCE

May 2025 – Present

Tpaul Integrated Service, Port Harcourt, Rivers State

Project Trainee Engineer

- Supported the design and implementation of HMIs and ladder logic programs for industrial automation projects.
- Gained hands-on experience with Rockwell Automation tools including RSLogix, FactoryTalk.
- Developed understanding of P&IDs, applying them in process design, instrumentation, and control.
- Collaborated with senior engineers in troubleshooting and validating automation logic to meet project requirements.
- Assisted in preparing documentation and reports for automation design and system configurations.
- Strengthened skills in control systems, instrumentation, and industrial standards through practical project exposure.
- Built teamwork, problem-solving, and continuous learning abilities by contributing to live project environments.

May 2023 – December 2024

DiligentCompanyL.T.D | Ocendo, Umueze Agbani,EnuguState

Cybersecurity Analyst

- Conducted thorough penetration testing to uncover vulnerabilities, reducing potential security breaches by 40%.
- Monitored network activity using tools like Wireshark and Splunk to detect and respond to suspicious behavior.

EDUCATION

2019 - 2024

ENUGU STATE UNIVERSITY OF
SCIENCE AND TECHNOLOGY
Bachelor of Engineering

SKILLS

- Programming & Control: Ladder Logic, Python, Flutter Dart
- Software & Tools: TIA Portal, RSLogix
- Hardware & Systems: PLCs, HMIs, Sensors & Instrumentation Process &
- Industrial Skills: Process Control, Industrial Automation, Professional
- Skills: Time Management, Teamwork, Critical Thinking
- Other Tools: Kali Linux, Burp Suite, Raspberry Pi, Arduino, Graphics Designer

ACHIEVEMENTS

Completed complex IoT project within tight deadlines, earning recognition from colleagues for exceptional problem-solving skills.

Phone: +2348064810572(reference)

LANGUAGES

- English

April 2021 – October 2023

Diligent Company L.T.D | Ocendo Umeze Agbani, Enugu State

Embedded Systems Engineer

- Designed and implemented an autonomous obstacle-avoidance robot with integrated gas detection capabilities, enhancing safety in industrial settings. Developed IoT-enabled systems by programming sensors and microcontrollers, facilitating real-time data monitoring and analysis. Collaborated with a multidisciplinary team to optimize hardware performance, achieving a 15% reduction in power consumption.
- Documented and presented project outcomes to supervisors, ensuring alignment with operational goals.

I N T E R E S T S

- Developing IoT devices for smart automation
- Problem-solving and system optimization
- App and graphics design

P R O J E C T S

- **Home Service Mobile Application (In Development):**
Developing a comprehensive home service platform that connects users with verified service professionals for on-demand and scheduled services. The app features real-time chat between customers and service providers. All in one App
- **Autonomous Obstacle-Avoidance Robot with Gas Detection Sensor:** Engineered a robot capable of navigating autonomously, avoiding obstacles, and detecting gas leaks to trigger alarms.
